

Concord Hospital car park update

850 new parking spaces will be created as part of the NSW Government \$32.4 million funding for additional parking facilities at the Concord Repatriation General Hospital.

The on-grade car park is now open, providing 300 new parking spaces. Staff with approved parking (i.e. swipe access to Hospital Road Car Park) can access this space via Gate 2 or Gate 4 and driving through the campus. Motorists are asked to avoid blocking traffic while queuing to enter the car park.

To help free up parking spaces for patients and visitors in the Hospital Road Car Park, staff are encouraged to use the new on-grade car park (P3 Car Park) as a first option.

Dedicated parking spaces for fleet vehicles will also be made available in the new on-grade car park. Further information will be provided to staff if their fleet vehicle parking is moving to the new on-grade car park.

With the on-grade car park now complete, works are set to begin on the multi-storey car park (MSCP), which will provide 550 new parking spaces for patients, staff and visitors. When works commence, the future entry and exit gates to the new MSCP site will be temporarily changed during construction and we will continue to update staff about these changes.

The new hospital car parks and drop off areas will improve access for staff, patients and visitors and we thank everyone for their patience while construction is underway.

Quick Facts

New on-grade car park

- Opened June 2023
- 300 new parking spaces
- Swipe card access only
- Entry via Gate 2 or Gate 4
- Dedicated fleet vehicle parking spaces

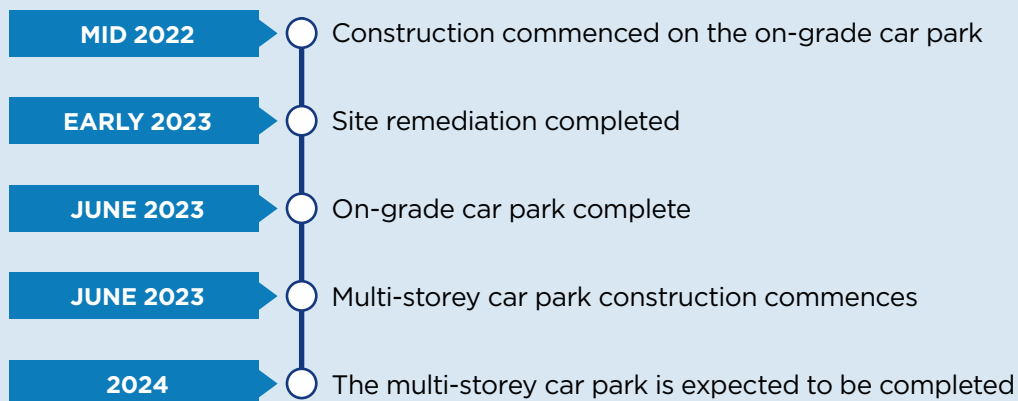

Multi-storey car park

- Site preparation works have commenced
- 550 new parking spaces
- Parking for patients, staff and visitors
- Entry and exit changes during construction
