CONSTRUCTION UNDERWAY ON NEW MULTI-STOREY CARPARK AT CONCORD HOSPITAL

Construction is underway on a new multi-storey carpark at Concord Hospital, which will provide more than 550 new spaces for patients, staff and visitors.

NSW Health Infrastructure Acting Executive Director Northern Region Hayley Bell said the five-level multi-storey carpark is being delivered as part of the \$32.4 million carpark project to increase parking capacity at the recently completed \$341 million Concord Hospital redevelopment.

“We’re excited to be delivering 550 new spaces, which is on top of the recently opened on-grade carpark that is providing 300 parking spaces for staff,” Ms Bell said.

“When complete, the new carparks will increase capacity on the hospital campus to more than 2,300 spaces.”

The new carpark will be delivered by Health Infrastructure in partnership with Sydney Local Health District. It will include accessible spaces and lift access. Security features will include CCTV throughout the car park and multiple duress points on each level.

Sydney Local Health District Chief Executive, Dr Teresa Anderson AM said once complete, the project will be invaluable in improving access to health care services for the entire community.

“We have partnered with Health Infrastructure to deliver the multi-storey carpark, which is part of a long-term strategy to improve the experience of visitors and staff at Concord Hospital,” Dr Anderson said.

The multi-storey car park will support the improvements and service enhancements resulting from the \$341 million redevelopment of Concord Hospital.

Further staff, consumer and community consultation will be undertaken to ensure that all patients, visitors, and staff are aware of the parking access changes and upgrades during the construction of the multi-storey car park.

“We thank our staff and the community for their understanding and patience during the construction period and look forward to delivering this important project,” Dr Anderson said.

Contractor, Lipman has been appointed to deliver the project, which is expected to be completed by late 2024.
